Grey Literature Report - November 1999

Vol.1, No. 2 November 1999

This is the second issue of the **Grey Literature Report**, designed to inform readers of new grey literature publications in the fields of health policy and public health as they are acquired by The New York Academy of Medicine Library. The **Grey Literature Report** serves as a current awareness tool for researchers, and as a collection development tool for librarians. Much positive feedback was received from the first issue of the **GLR**. We are also following up on suggestions. We are investigating search capabilities. In addition, we are now offering you the ability to **sign up to receive the notification of a new Grey Literature Report** at the time it is published on the web. To do so, send an email message to mascher@nyam.org with the words "subscribe Grey Literature Report" prominent in the body of the message. Also, feel free to send any comments and suggestions (and/or praise) to that address. We look forward to hearing from you and appreciate your feedback. Signing up for the subscription service will not place you on other mailing lists.

Following is our latest batch grey literature acquisitions. It is from a wider range of organizations than the list published in our [first issue](#). We are constantly trying to identify [organizations](#) publishing grey literature and obtain their publications. As we did previously, we include links to the full-text of the publication if the publication is available on the web. Otherwise, we include a link to a site that contains ordering information for the publication when known.
